

Suggestions for Assembly

#1--Print out the entire pdf file. (Should yield 15 pages.)

#2--Separate this instruction sheet and organize the remaining pages into 7 groups of corresponding top and bottom pages. (1a is the top and 1b is the bottom, then 2a & 2b, ect.)

#3--Beginning with page #1 trim the excess paper from each sheet following the black-dash lines, always leaving the left margin intact for the overlap.. Lap the bottom section over the lower part of the top section seeing that the data in each section are snugly joined together and the rows are aligned. Once the two sections are in place secure them at the seam with transparent tape. (Several short pieces are easier to manage than one large one.) A few pieces of tape on the seams on the backside will make the chart sturdier. This should result in 7 pages with a page number at the bottom of each. On the complete chart the page numbers will run from 1 through 7 beginning from the left.

#4--Lay page #1 aside for the moment and join pages 2 and 3 side by side again making sure the columns and rows are aligned. When the two pages are in place secure the seams with tape, front and back. Then join pages 4 & 5 in the same manner and then do Pages 6 & 7. When this is complete there should be three sections of the chart plus the first page.

#5--Join the three sections in the same manner making sure the page numbers are in order and tape the seams.

#6--The first page may then be joined to the front (left) of the chart or it can be left free to be moved over the chart as an index. You should now have a chart approximately 11 inches wide and 5 ½ feet long.
